## TO THE GROWER

2024 is upon us and we are seeing a few great additions to the selection this season!

Argyranthemum Aramis is a new series including varieties with double flowers. Olearia Spring Bling is a new shrub type addition that is compact enough for the patio but can also be added to landscapes to let it show its true potential. Lastly the Senorita series of Osteospermum is sure to please with its sunset tones with sun loving petals.

We've brought together the selection of 7+ different suppliers and put them all in one place to make planning your next growing season simple.

We take this moment to say thank you for choosing Devan Greenhouses for your Young Plant needs. We are here to help anyway we can!
